General tips

Count the number of shots to destroy a reactor; shoot it two or three times less than that on the way down

Keep the sound turned up so that you can tell if you're hitting a reactor with your bullets when it's off-screen

In reverse gravity, always let the pod precede you through tunnels

Collect all fuel and destroy all guns on the descent

Use shield whenever descending into an area where guns are active

Frequent use of the shield is essential for the invisible sections

Emmet Masterson and Simon O'Connell have an excellent tip for skipping through levels. Just hold down the 2, 5, 8 and up-arrow keys on the keyboard and press Escape. That will skip you forward one level with a mission-complete bonus.
